Application Development

"[Company X] solutions offer high productivity environments and tools for developers of embedded and real-time applications. What makes [Company X] different is our focus on giving you superior alternatives to the paradigms used by your competitors, which are inherently inefficient and error prone. For over a quarter century, [Company X] technologies have been used in the most demanding and rigorous applications worldwide to build reliable and scalable applications in avionics, aerospace, telecom, network infrastructure, automotive, industrial automation, military, transportation, office automation, and consumer electronics industries."

You've come to the right place if you are looking for productivity environments and high impact tools for embedded and real-time application development. For over a quarter century, [Company X] has pioneered a new paradigm in software development implementing successful solutions in avionics, aerospace, telecom, network infrastructure, automotive, industrial automation, military, transportation, office automation, and consumer electronics industries. If you would like to cut down on the inefficiencies of traditional application development and are interested in looking at a proven new way to build quality applications faster, call or click for more information and start down the path to better software development with [Company X] today.

"Today's embedded systems are more demanding and varied than ever. With application areas as diverse as fleet telematics, industrial automation, civil avionics, and military field equipment and network infrastructure, project success depends upon equally diverse tools. But one thing that hasn't changed is the need for efficient, dependable, and predictable software development—the kinds of benefits commonly associated with the Java development paradigm.

[Company X], a decades-long industry leader in real-time and safety critical tools, and pioneer in Java platform technologies, has brought together these two strengths to meet the needs of today's mission critical developers. As a participant in the Java Community Process and a key contributor to the development of standardized RTSJ profiles for hard real-time and safety critical applications, [Company X] is uniquely positioned to make this technology a reality.

The [Company X] approach starts with cleanroom implementations based on standard Java platforms, and the existing RTSJ specification. By defining profiles that both subset and supplement established standards in an open, standards-based forum, [Company X] has developed technologies for three complementary market segments: complex, dynamic soft real-time; deeply embedded and high-performance hard real-time; and certifiable safety critical applications."

Why not partner with a pioneer? [Company X] is a participant in the Java Community Process and a key contributor to the development of standardized RTSJ profiles for hard real-time and safety critical applications. As a decades-long industry leader in Java™ platform technologies we are uniquely positioned to help you meet the exacting requirements of developing for today's varied and demanding embedded systems. Whether you are developing for fleet telematics, industrial automation, civil avionics, network infrastructure or something else, your success depends on powerful, robust tools and proven technology that will help you deliver better applications more efficiently. Our unique approach starts with cleanroom implementations and covers everything you need in the areas of dynamic soft real-time, high-performance hard real-time and certifiable safety critical applications.

Book Publishing

"[Company X] offers products and services including:

- * Media
- * Print Services
- * Packaging
- * Fulfillment
- * Project Management

that are integrated solutions designed to solve problems of time, money and resources exclusively for the book publishing industry. We develop solutions through continual investments in understanding our customer's business, program and project objectives. We achieve success through ongoing communication and collaboration."

Over 20 years [Company X] has become the leading provider of media and related services for the book publishing industry and we are your one-stop shop for everything from print services to packaging, fulfillment and much more. Nowhere else do you have access to a dedicated team of publishing specialists who will see through highly customized complex jobs as well as high-volume, quick turnaround projects from inception to completion. We have the experience and resources to help you deliver on time and within budget as we have done thousands of times for multitudes of satisfied customers over the years. Talk to one of our expert Account Managers today and find out how you can benefit from increased efficiencies, greater productivity and substantially lower costs over the life of the titles you entrust to us.

Broadband Solutions

"[Company X] has quickly established itself as an IT solutions provider delivering world-class Server, Storage and Security Solutions to today's enterprise environment. Epic has been recognized as one of the fastest growing technology companies in Colorado three years in a row by Deloitte & Touche in their annual Colorado Technology Fast 50 program. Our mission is to assist our clients in applying Information Technology to yield the highest corporate benefits possible. Computer Systems should be designed and constructed to assist and complement the entire business environment. Properly applied Information Technology can support an organization by increasing profits and/or lowering costs."

Your business demands more than a "one size fits all" approach to technology which is why you can rely on [Company X] for the expertise to create customized IT solutions to meet your specific needs. From Servers, Storage and Security to state-of-the-art Data Center Technologies, our success in implementing optimal solutions for our customers has made us Colorado's fastest-growing technology company according to Deloitte's prestigious Technology Fast 50 Program. Call today and find out how you can head down the path of greater IT success with Epic. Leave the technology to us so that you can go back to focusing on your business and customers instead.

Financial Services

"Trusted by insurance companies, financial services companies, and business process outsourcers around the world, [Company X] has delivered them solutions to increase productivity, decrease operating costs, and bring consistency to people-intensive operations by leveraging, not replacing, existing systems. Our solutions and technology are focused on improving the efficiency and effectiveness of service organizations.

We know your business. Through our work with leading Insurers, Financial Service and BPO providers around the world, we've developed a series of solutions that address the challenges and complexities found in these areas. Our decade of experience, depth of understanding and established solutions provides a unique perspective to transform businesses not found elsewhere.

Our solutions have transformed people intensive operations in claims, policy administration, and underwriting found in property and casualty and life insurance operations. Specific solutions include: First Notice of Loss, Med Pay/PIP claims processing, Subrogation, Commercial Underwriting, and Policy Administration."

How would you like to free up 50% of key employees' time while benefiting from a suite of solutions designed specifically to meet the needs of the financial services industry? [Company X] is the leading provider of solutions shown to dramatically improve productivity and reduce

operating costs in labor intensive functions such as First Notice of Loss, Subrogation, Med/PIP Claims, Commercial Underwriting and Policy Processing. Get back to the business of serving your customers and leave the technology to us. Join leading companies who have realized astonishing gains across the enterprise by choosing [Company X]. Call or click today to learn more about [Company X] and the solutions, service and support that have made us the #1 choice of financial services companies looking to maximize their technology advantage.

"[Company X] focuses on the financial services marketplace by providing state-of-the-art industry specific products and services. We provide mission critical technologies that enable our clients across the globe to strengthen relationships, improve productivity, drive new revenue, and reduce training and administrative costs. Our clients have grown to include some of the largest banks, credit unions, insurance providers, retailers and wealth management companies in the world."

How can you better serve your customers and the market? Today's financial services market is a complex landscape of regulations, partners, customers, information and technology. Finding the right technology to help you navigate these waters is crucial which is why you can rely on [Company X]. Our suite of financial services applications is built by industry experts for the industry with unique advantages that enable customers to achieve greater efficiencies and innovations. [Product X], [Product Y] and the other components of our integrated suite make everything from Internet Banking to CRM easier than ever and give you the power to continue to change as you continue to grow.

Identity Management

"We are the trusted provider of solutions and services that protect and secure personal identities and assets. Together, our portfolio of companies - [Company A], [Company B], [Company C], [Company D], [Company E], [Company F], [Company G], [Company H] and [Company I] - deliver the full range of offerings required for solving the problems associated with managing human identity. Our offerings form the cornerstone for building convenient and secure identification (ID) solutions. They are built on a 20-year history of trust and reliability established by serving the identity needs of federal governments, civil agencies, law enforcement, border management agencies and commercial businesses."

Are you 100% secure in your identification and authentication systems? [Company X] has brought together the leading technologies in the space over the last 20 years to provide you with a single solution that combines the best technology and expertise to protect and secure personal identities and assets. Our portfolio of companies - [Company A], [Company B], [Company C], [Company D], [Company E], [Company F], [Company G], [Company H] and [Company I] - delivers the only full range of offerings required for solving the problems associated with managing human identity, letting you focus your efforts on business. Our

partnerships with federal governments, civil agencies, law enforcement, border management agencies and commercial business ensures that we have you covered too.

Industrial Computers

"[Company X]'s wide industrial computer selection provides efficiencies and reliability all while satisfying the demanding tasks inherent of a rugged computer. Within industries such as warehousing and logistics, manufacturing, construction, police and public safety, companies are implementing management information and data collection systems that streamline operations and increase productivity. The foundation for these efforts is built on rugged, full powered industrial PC systems that are durable and reliable - systems from [Company X]."

Do your employees in the field have the very best computers? Are you getting the mileage you need from your mobile PC systems? What about support? [Company X] is the leading provider of rugged, industrial strength field computer systems that are built and certified on industry standards and supported by teams of experts dedicated to serving you. From shop floor to the great outdoors, forklifts to trucks, our versatile systems are durable and easy to use letting your team focus on work instead of, "why doesn't it work?" If you want the best it's time you gave us a call and let us show you what field computer systems can really be like.

Manufacturing Automation

"[Company X] is a group of 16 engineers focused on helping manufacturers of automated machinery survive and thrive through innovative products and services. Our core competency is Motion Control and associated machine automation components. Our staff of fourteen 4 year degreed engineers and 6 support staff offer over 100 years experience in the field of automation across many industries. Through this experience, exposure to many industries and intensive, ongoing training, we lower your risk and guarantee the success of your automation project. Feel free to tap into the wealth of knowledge here on our web site and by contacting our staff."

What do you want to accomplish? We are [Company X] and we are passionate about Motion Control and everything to do with machine automation. If you are based in New England and require expertise and guidance implementing automation systems then you have come to the right place. We are engineers, not salespeople, and will work with you to assess and implement automation technologies to help you reduce costs, increase efficiencies and fully harness the power of technology. We are the best at what we do and that way you can go back to doing what you do best too. Chat with one of our friendly engineers today to share thoughts or talk about how a Technology Assessment can help you map the big picture of what you do to how you can do it better.

Medical Technology

“[Company X] is a medical technology company focused on the minimally invasive surgery market providing laparoscopic instruments. [Company X] is committed to providing innovative electro-surgical products that optimize surgeon technique, improve patient outcomes and enhance patient safety.

[Company X] has developed and launched innovative surgical technology, called active electrode monitoring, that is emerging as a standard of care in minimally invasive surgery. [Company X]’s patented AEM surgical instruments provide surgeons with the desired tissue effects, while preventing patient injury caused by stray energy burns, a recognized risk in laparoscopic surgery.”

The premier laparoscopic surgeons in the country refuse to operate without Active Electrode Monitoring (AEM) and so should you. With over 4.5 million laparoscopic surgeries now performed every year in the US alone, your risk of patient injury through stray energy burns as a result of performing this procedure has increased significantly. [Company X]’s AEM technology has emerged as a new standard in minimally evasive surgery providing you with the only fail-safe monitoring system ensuring patient safety throughout the operation as critically high energy incisions are made with greater control and precision. [Company X]’s groundbreaking electro-surgical products are revolutionizing the medical industry and we invite you to join hundreds of leading hospitals nationwide and find out how you can enhance patient outcomes by equipping your surgeons with the best technology the market has to offer.

MRO

“[Company X] integrates software, hardware and professional services to offer you a total MRO management solution – one designed to enable you to focus exclusively on your core business. We help manufacturing and facilities maintenance operations reduce overall costs, improve asset utilization and increase productivity, all the while ensuring that the right materials are in the right place at the right time. When we say asset utilization, we are not just talking about the asset itself – we’re talking about resources and maintenance personnel as well. We focus on management’s top priority – increasing “throughput” of the organization.”

Take MRO to the next level and ensure that the right materials are in the right place at the right time. Traditional Inventory Management is costly, manual and labor-intensive. [Company X] turns MRO into an asset for your organization by allowing you to reduce costs and improve efficiencies with an end-to-end automated solution. [Company X] is the leader in MRO Inventory Management Solutions and has helped companies in nearly every major industrial market

segment capitalize on key technology and expertise to achieve sustainable returns while reducing MRO spend by 25-40% on average. We've done it for others and we can do it for you too.

Network and Storage

"[Company X] is a leading supplier of high performance storage networking solutions, which include the controller chips, host adapters and fabric switches that are the backbone of storage networks for most Global 2000 corporations. The company delivers a broad and diverse portfolio of products that includes Fibre Channel HBAs, blade server embedded Fibre Channel switches, Fibre Channel stackable switches, iSCSI HBAs and iSCSI routers. The company is also a leading supplier of InfiniBand switches and InfiniBand host channel adapters for the emerging high performance computing market. [Company X] products are delivered to small-to-medium businesses and large enterprises around the world via its channel partner community. [Company X] products are also powering solutions from leading companies like [Reference A], [Reference B], [Reference C], [Reference D], [Reference E], [Reference F], [Reference G] and [Reference H]. [Company X] is a member of the S&P 500 Index."

[Company X] is the #1 market leader with the solutions and expertise you need to take your host, network and storage infrastructure to the next level and beyond. We make the controller chips, host adapters and fabric switches that are the backbone of storage networks for most Global 2000 corporations as well as critical technology that powers leading hardware companies like [Reference A], [Reference B], [Reference C], [Reference D], [Reference E], [Reference F], [Reference G] and [Reference H]. With numerous industry firsts, market leading products and accreditations, you can rely on us to provide the solutions and coverage you expect from the industry leader.

Product Development

"[Company X] provides a full suite of product development services. Whether you are in the 11th hour of your project or have yet to start, [Company X] has a full range of capabilities including industrial design, engineering, embedded systems, analysis and much more. Call us if you require assistance in any area of product development. If we cannot help you ourselves, we probably know someone who can. Our customers believe we deliver the best product development services available anywhere. Find out how [Company X] can be the partner that truly is "in sync" with you."

What if there was a company to whom you could turn for any and all help in developing and manufacturing new products? [Company X] is all that and more. We are your #1 Product Development resource offering everything from analysis to mechanical and electrical

engineering expertise, ergonomics, prototyping and industrial design. Our clients include the biggest names amongst aerospace, transportation, consumer, medical and industrial companies so choosing [Company X] allows you to rely on experience and expertise to take product innovation to the next level. Because we have worked with virtually every process and material used in manufacturing we quickly begin contributing to your project and extend your team for maximum impact in new product development. If you have thought about outsourced engineering and industrial design before then now is the time to take the next step. Call or click for more information on how you too can leverage leading minds and much more to take your products into tomorrow and beyond.

Retail POS

“[Company X], based in San Diego, California, has been providing software and services from mid-sized to large retailers since 1987. [Company X] has installed some 50,000 Point-of-Sale lanes at leading retail chains where accuracy and reliability of data has been of paramount concern.

Also known as [Company X], [Company X] is a joint venture between [Company Y] and [Company Z]. [Company X] provides an end-to-end "Post-to-Host" solution via integrating [Product X], its store-based POS solution for North American retailers, with [Company Y]'s flagship Merchandising System, [Product Y]. [Company X] will also leverage off [Company Z]'s extensive experience in providing end to end solutions to the Australian market for over 15 years.”

If you are concerned about the accuracy and reliability of your retail data transactions you should think about partnering with us. For over 20 years [Company X], also known as [Company X], has been the leading POS solution provider in North America and is now installed in some 50,000 point-of-sale lanes at leading retail chains. A joint venture between [Company Y] and [Company Z], [Company X] now provides an end-to-end "Post-to-Host" solution by integrating the [Product X] POS solution with [Company Y]'s flagship [Product Y] Merchandising System. The result? Only the most reliable, efficient solution on the market trusted by the biggest retail names in apparel, entertainment, footwear, home and many more. Click or call today to find out how you can improve the bottom line by trusting [Company X] with your retail system requirements and doing business with the best.

“The [Company X] product is designed to be fully integrated with the [Company X] host set of modules. The system consists of a robust set of POS features that enable it to be installed in a wide range of retail vertical markets with none or little customization required. The system will include a pre-determined set, or table, of parameter controls called Store Personality Tables (SPT). The SPT specifies the parameters that may differ from store, or state, to another, such as Tax Tables, Store Number, Credit Card limits, Receipt printing options, etc. The SPT parameters

are defined later in this document and are referred to frequently throughout areas of register functions definition. [Company X] can be sold as a 'shrink-wrapped' product to any retailer who will accept the functionality as is without requiring custom programming. [Company X] is also used as the starting base for all customers who require a customized application. ”

[Product X] is the full-featured, powerful retail system solution you can install with little or no customization to meet all of your retail system requirements. [Company X]'s pioneering Store Personality Tables (SPT) technology lets you quickly capture all the variables that differ from store to store such as tax tables, store numbers, credit card limits and more. [Product X] easily adapts to the varying and complex demands of different verticals and store environments so you can become functional faster and stay productive for longer. [Product X] integrates with other [Company X] modules to provide a combined solution so that you can leave the technology to us and focus on the business of serving your customers.

R&D

“[Company X] is a research, development and commercialization company that specializes in the creation and conversion of innovative technologies to commercial successes.

The firm’s R&D efforts address problems that have a significant impact on the health, security, environment and quality of life around the world. Many of [Company X]'s R&D projects target areas that have been overlooked or neglected by larger R&D companies, but nonetheless have considerable market potential.

[Company X] has been awarded numerous patents for its innovative technologies and has many more patents pending. Since its founding in 1985, the firm has been awarded approximately 130 research grants totaling more than \$40 million.

Headquartered in Littleton, CO, [Company X]'s scientists, engineers and support personnel work diligently to identify market opportunities for new technologies, obtain funding to develop the technologies, conduct cutting-edge research and development, and determine the best approach for launching the technologies into the market. In recognition of its successes, [Company X] has received numerous honors, including:

- 2006 & 2007 Colorado Technology Fast 50
- 2006 & 2007 Best Companies to Work For in Colorado
- 2006 Tibbetts Award
- Colorado’s Top Technology Company 2005 & 2007

[Company X] recognizes the interdependence and equal importance of creating innovative

technologies and successfully commercializing those technologies. To optimize the commercial success of its products, [Company X] has established separate companies that are focused solely on marketing specific [Company X] products or product lines.

[Company X] Technologies companies include:

- [Company A]
- [Company B]
- [Company C]
- [Company D]
- [Company E]”

Bringing Innovative Technology To Life

Headquartered in Littleton, CO, [Company X] identifies market opportunities for groundbreaking new technologies and obtains funding to realize these technologies through a series of specialized subsidiary companies. Since 1985 [Company X] has secured over \$40 million in research grants to develop innovative technologies and bring these to market as effectively as possible.

A Recognized Culture of Success

Our success is based on the diligent efforts of teams of experts and our efforts have been recognized through numerous honors and awards including Colorado’s Top Technology Company, Colorado Technology Fast 50, Best Companies to Work For in Colorado and the Tibbetts Award. Bringing the best minds to bear and a result-oriented environment means we can continue to bring the best new technologies to the market for a better tomorrow.

Research For A Better World

Cutting-edge research efforts conducted by [Company X] scientists and engineers address problems significantly impacting health, security, the environment and quality of life around the world. Our work often involves areas with significant potential that have been overlooked or neglected by larger companies but nevertheless contain seeds of great benefit and value.

Market-leading Methodology

We know it's not just good ideas that change the world. That's why [Company X] is focused on both the technological and business aspects of the solutions we create. Our subsidiary companies include [Company A], [Company B], [Company C], [Company D] and [Company E] and are specifically dedicated to the work it takes to bring individual [Company X] product lines and projects to life.

Resource Management

"[Company X] provides information technology-based business solutions for resource-based enterprises. [Company X] serves Forest Products, Agriculture, Environment, Utilities and Government markets in North America and around the world.

The company offers industry-leading raw material supply chain execution and optimization solutions for the Agriculture and Forest Products sectors. These solutions enable our clients to make sustainable cost reductions and add value to their products by focusing on solving quality, productivity, compliance and operational business challenges.

Our clients are of every size – some of the world's largest and best-known, forest products, agri-business and conservation organizations as well as small and medium-sized businesses and state and federal departments. Our 17-year history of serving spatial solutions around the globe puts us in a unique position to understand and help you address complex business issues."

We are the leading provider of business optimization solutions serving Forest Product, Agriculture, Environment, Utility and Government organizations around the world. [Company X] is focused on helping you solve quality, productivity, compliance and operational business challenges that affect raw materials management and land-based activities. Modular, integrated solutions allow you to add value throughout the supply chain from operations to field data management, procurement, inventory, certification and more.

For over 17 years [Company X] has helped some of the biggest names within the industries we serve enable a quick ROI, effective decision making and increased productivity through our proven solutions and expertise. A range of products and services ensures that your requirements are carefully analyzed and matched to the best solution to meet your needs. We invite you to join the ranks of customers that have benefited from our experience and technology. Call today and find out how better solutions can start you down the path to enhanced supply chain execution and optimization.

Security

"Forthright. Proven. Strategic. Practical. Innovative. These are the characteristics that define [Company X] as an organization and differentiate us from our competition. We rely on these qualities to accomplish our mission: designing and executing strategies to address our clients' complex information security challenges. Our clients see them in action as our teams of security advisors help them assess risk, improve compliance, and secure infrastructure."

Are you confident that your security infrastructure meets the challenges of technology and the demands of your business? With [Company X] you can be. We are a leading national security consulting organization with solutions and expertise to align your security strategy with your business objectives and allow you to focus instead on your customers. Security is complicated but the answer is not. Our unique Security Coverage Model and teams of experts provide solutions that will minimize risk and ensure compliance and optimum security.

Semiconductor Networking

“[Company X] designs, develops and sells semiconductor networking solutions for communications applications such as VoIP and broadband optical transmission in enterprise, access, metropolitan and wide area networks. The company's three key product families include high-performance analog transmission and switching solutions, multiservice access products designed to support voice and data services across wireline and wireless networks, and WAN communications solutions including T/E carrier, network processing and traffic management devices. [Company X]'s products are used in a wide variety of network infrastructure equipment including voice and media gateways, high-speed routers, switches, access multiplexers, cross-connect systems, add-drop multiplexers and digital loop carrier equipment.”

Reducing total system cost, decreasing host-processing requirements and speeding up time-to-market are some of the advantages leading companies achieve every day by utilizing [Company X]'s leading semiconductor networking solutions. We cover everything from IP Processing to Analog Solutions to WAN Communications and trusting our expertise means that you can go back to focusing on business and leave the technology to us. [Company X] leads the industry in communications applications extending from the edge of the Internet to linked metropolitan networks. Partnering with us is a commitment to the quality, support and competitive advantage that have become our hallmarks as the market's leading innovator in advanced networking solutions and much more.

Services Procurement

“[Company X]'s managed services and market-leading software allows global 2000 enterprises to fully control their outside service spending. Organizations gain compliance and visibility into all types of services spending such as contingent labor, projects-based spending, outsourcing/off-shoring, field services and more. [Company X] empowers customers to quickly and easily turn complex services spend into a new source of value, competitive advantage, and continuous bottom-line improvement.”

Your services procurement spend and complexity continues to grow and you need a solution that helps you manage the complete array of your services requirements. [Company X] is the industry leader in services procurement technology with the solution that companies like [Reference A], [Reference B], [Reference C], [Reference D] and [Reference E] use to gain control and visibility into services procurement costs. Our award-winning suite will integrate with your existing systems to quickly provide you with optimal services procurement management capabilities from metrics to compliance to a vendor-neutral services offering allowing you to manage your entire range of enterprise services from end-to-end. Call today and find out how you too can join leading companies in the path towards enhanced service procurement with [Company X].

Testing

"[Company X] was founded in 1991 as a specialty manufacturer of accelerated stress equipment. [Company X]'s products and services are designed and refined as a result of continual and extensive research and development. [Company X] has since evolved into a full service, global organization offering:

- * HALT/HASS Systems and Electrodynamic Shakers
- * Slip tables
- * Components, Parts, Repair and Services
- * Test Lab Services
- * Training Programs
- * Project Management

[Company X] brings the best combination of support and technology to make our customers' testing programs successful. [Company X]'s industry leading Lowest Total Cost of Ownership will enable our customers to continue saving throughout the lifetime of the machine. This can amount to tens of thousands of dollars per year. Additionally, our customers worldwide receive a valuable resource through our Training, Support and Service that helps them to have a higher Return on Investment.

Our customers are some of the biggest manufactures of consumer products, members of the Fortune 500 and the Fortune 1000 such as [Reference A], [Reference B], [Reference C], [Reference D], [Reference E], [Reference F], and [Reference G], and have partnered with [Company X] to implement and manage corporate-wide testing programs. These programs are driven by market demand to provide reliable products whose timely releases keep pace with technology advancements."

Welcome to [Company X], makers of the best-selling HALT / HASS line in the world and a host of leading vibration and temperature testing equipment and services. Partnering with us means joining the biggest names in consumer product manufacturing from [Reference A], [Reference B], [Reference C], [Reference D], [Reference E], [Reference F], and [Reference G] to a host of other Fortune 500 and 1000 companies in a wide range of industries.

We have built our name on providing the best combination of support and technology to make your testing programs successful. Through extensive research and development and steady growth we bring together and offer you the best minds and the best products in the market today. As our customer you will benefit from a rich array of training, consulting and support services in the areas of accelerated testing and product design improvement. With all this to offer in addition to the industry's lowest Total Cost of Ownership you need not look elsewhere for products and services to provide the greatest value and success to your testing initiatives.

Warehouse Management Systems

"[Company X] has been providing software for managing and disbursing inventoried items for over two decades. Our end user clients include warehouses, distribution centers, stockrooms, manufacturers, government agencies and other facilities, both large and small. Our nationwide experience across a wide range of industries and applications gives us an exceptional knowledge base. Talk to our technical team and you're likely to conclude two things: We quickly understand your needs. We offer intelligent solutions."

[Company X] is the leader in Warehouse Management Systems and will help you manage all aspects of material handling productivity and accuracy for improved bottom line results. For over two decades we have been leading the way in bringing the foremost solutions in the market to warehouses, distribution centers, stockrooms and manufacturing facilities for government agencies and leading organizations. If you are looking for a trusted partner that will understand your needs and provide intelligent solutions that meet your requirements you have come to the right place. Call today and find out how you can start down the path towards better, cost-effective WMS.

Workgroup Automation

"[Company X] is a leading developer of application software that enhances communications and automates business processes within workgroups and across the enterprise. [Company X]'s application solutions leverage the Internet, Public Telephone network and Corporate data networks to connect all members of the workgroup to each other, to the business processes they are responsible for, and to the information necessary to support each workgroup role, anytime and anywhere. [Company X] offers hosted application solutions for a wide range of corporate

workgroups including Human Resources, Customer Support and Facility Maintenance. Through its [Product X] line of software products, [Company X] also offers Interactive Voice Response and Unified Messaging applications."

[Company X] pioneered the integration of voice and telephony with Lotus Notes and Domino so you've come to the right place if you are interested in workgroup applications to enhance communications and automate business processes. The combination of phone and web browser access means that all across the Notes enterprise workgroup members can connect to each other and the business processes and information they need anytime, anywhere. If you rely on Notes and Domino to power your organization then it's time you took a look at [Company X]'s leading self-service solutions for unified messaging, human resources management, customer support, and facility management to improve organizational efficiencies and help you do what you do better. Whatever your infrastructure or needs, you can rely on us to deliver the solutions and expertise that meet your requirements. Call or click today to find out how you can take workgroup applications to the next level with [Company X].
